Milwaukee, WI -- Sweet Water announces the election of Brett Wallace to the Sweet Water Steering Council. Wallace is a professional engineer and serves as the Southeast Region Operations Director for the Wisconsin Department of Transportation.

Nancy Frank, chair of Sweet Water's Steering Council commented, "We are fortunate to have the active involvement of one of the leaders in the Wisconsin Department of Transportation (WisDOT) on the Steering Council. The connection to WisDOT establishes lines of communication that could lead to opportunities for mutual benefit of the transportation network and water quality. Brett brings years of experience and professional background, which I know will benefit Sweet Water."

Wallace joins the 14 member Steering Council comprised of representatives from municipal and county government, agencies and utilities, non-profit organizations, and industry. The Steering Council provides leadership and direction for Sweet Water's efforts in the Greater Milwaukee Watershed.

Wallace commented, "Joining Sweet Water's Steering Council is a natural extension of my interests in community involvement and the outdoors. I'm pleased to join the partnership and to have the opportunity to help advance the Sweet Water's goals."

With many stormwater initiatives interfacing with transportation projects, Wallace will bring a critical perspective and valuable expertise to the Steering Council. For a full roster of Sweet Water's Steering Council, go to http://www.swwtwater.org/home/executive_steering_council.cfm.

###

Sweet Water, the Southeastern Wisconsin Watersheds Trust, is a nonprofit organization created in 2008 as a partnership of local governments, nonprofit organizations, businesses, academia, and individuals working collectively to improve the water resources in the 1,100 square miles of Greater Milwaukee Watersheds.
