<sup>a</sup>Generalized priorities are assigned by recommendation. For certain municipalities or agencies, the priority for implementing a given recommendation may be higher or lower than the assigned priority, depending on specific circumstances and changed conditions over time.

<sup>b</sup>For those municipalities located outside the Southeastern Wisconsin Region, the management agency designation is advisory only.

<sup>c</sup>The Wallace Lake Sanitary District also serves part of the Town of Barton.

<sup>a</sup> Generalized priorities are assigned by recommendation. For certain municipalities or agencies, the priority for implementing a given recommendation may be higher or lower than the assigned priority, depending on specific circumstances and changed conditions over time.

<sup>b</sup> In some counties, existing county programs may be providing the additional oversight of POWTS recommended for town utility districts to perform. In these instances, it may not be necessary to form town utility districts for the sole purpose of providing supplemental oversight of POWTS.

<sup>c</sup> For those municipalities located outside the Southeastern Wisconsin Region, the management agency designation is advisory only.

<sup>d</sup> As of the date of publication of this report, Kenosha County did not have an active drainage board.

<sup>e</sup> While land trusts are not governmental agencies, they could play a significant role in implementing certain recommendations.

## Table 98 Footnotes

<sup>a</sup>Designation of management agencies is not required under the Federal Clean Water Act. Thus, these designations are advisory only.

<sup>b</sup>Generalized priorities are assigned by recommendation. For certain municipalities or agencies, the priority for implementing a given recommendation may be higher or lower than the assigned priority, depending on specific circumstances and changed conditions over time.

<sup>c</sup>Need for sanitary survey depends on results of public health monitoring.

<sup>d</sup>Need for remedies depends on results of public health monitoring and sanitary surveys.

<sup>e</sup>This lake district or association does not currently exist, but is recommended to be established.

<sup>f</sup>The North Shore Health Department includes the City of Glendale and the Villages of Brown Deer, Fox Point, and River Hills.
