# Building Your List

Where to store your data.

The image shows a screenshot of a Microsoft Excel spreadsheet. The title bar at the top reads 'List of Agreements - PRIVATE.xlsx - Excel - General'. The ribbon is set to 'Home', showing options for Clipboard, Font, Alignment, and Number. The spreadsheet has a title 'Stormwater Management Practice Agreements' in cell A1. The data is organized into a table with the following columns: Property, Location, Watershed, SW Management Practices Covered, and Owner. The rows list various properties and their associated stormwater management practices.

Property	Location	Watershed	SW Management Practices Covered	Owner
Applewood of Brookfield	2800 N CALHOUN RD, Lot 2 of CSM No. 10998 S15 T7N R20E	Underwood Creek	Retention Basin (1), Curb Cuts (2), Grass Swale (1), Catch Basins	Apple-Brookfield LLC

RE: Stormwater Management Practice Agreement

Dear Property Owner:

As you are aware, ~~XXXXXXXXXXXX~~ has a recorded Stormwater Management Agreement. As time passes, the “Owner” of this Agreement can change and the name the City has on record is no longer accurate. Since it is vital to have an accurate record of the current “Owner” I am requesting this information from you. Please provide me with a contact name or title (e.g., Facility Manager, Association President, etc.), mailing address, telephone number, email, and website (if available). Furthermore, if there is an individual or company that currently handles the maintenance of the stormwater facility, please provide me with that information as well. An email containing this information is preferred; however, you are welcome to call me or mail me back this information. In the event that you are not the correct individual to provide this information to me, please forward this letter on, or provide me with this individual’s contact information.

Additionally, in accordance with said Agreement, and under State of Wisconsin Administrative Code, Chapter NR 151.121, the owners/management for the stormwater facility must perform routine inspections and maintenance of the facility as outline in the signed Agreement. **Beginning in 2024, the City is requiring that evidence** of inspections, maintenance and any repairs be submitted to the City. The submittal shall include all inspection and maintenance documents from the previous 24 months (e.g., a report submitted in January of 2024 will include documents for all of 2022 and 2023).

Inspection reports must be received by the City on or before **January 31st**. Documents can be mailed to the attention of the Stormwater Engineer, City of Brookfield, 2000 N. Calhoun Road, Brookfield, WI 53005, or email to [caven@ci.brookfield.wi.us](mailto:caven@ci.brookfield.wi.us).

Please feel free to contact me with any questions.

RE: Stormwater Management Practice Agreements

Dear Owner:

As you are aware, [REDACTED] Square have recorded Stormwater Management Agreements. As time passes, the "Owner" of these Agreements change and the name the City has on record is no longer accurate. Since it is vital to have an accurate record of the current "Owner" I am requesting this information from you. Please provide me with a contact name or title (e.g. Facility Manager, Association President, etc.), mailing address, telephone number, email and website (if available). An email containing this information is preferred; however, you are welcome to call me or mail me back this information. In the event that you are not the correct individual who can provide this information to me, please feel free to forward this letter on, or provide me with the individual's contact information.

Additionally, in accordance with said Agreement, and under State of Wisconsin Administrative Code, Chapter NR 151.121, the owners/management for the facility must perform routine inspections and maintenance of the on-site stormwater facilities as outline in your signed Agreement. **Beginning in 2024, the City is requiring that evidence of inspections, maintenance and any repairs be submitted to the City.** The submittal shall include all inspection and maintenance documents from the previous 24 months (e.g. a report submitted in January of 2024 will include documents for all of 2022 and 2023). Inspection reports must be received by the City on or before **January 31st**. Documents can be mailed to the attention of the Stormwater Engineer, City of Brookfield, 2000 N. Calhoun Road, Brookfield, WI 53005 or email to [caven@ci.brookfield.wi.us](mailto:caven@ci.brookfield.wi.us).

# Current Maintenance: Finding the Responsible Party

The screenshot shows the website for Bradon Preserve. The browser address bar displays "bradonpreserve.com". The top navigation bar includes links to "Plex", "DNR Permit Search", "AutoCAD Civil Imm...", "Brookfield - All Doc...", "Brookfield Staff We...", "Brookfield Intranet...", "Brookfield MS4 Per...", "Cartegraph", and "Chapter NR 151". A "Please log" link is visible in the top right corner. The main content area features the Bradon Preserve logo, a photograph of a stone sign with the logo, and a weather widget showing "Clear Sky", "75.5°F", and "40%". Below the sign image is a "Pages" menu with the following items: Home, Alerts 2021, Alerts 2020, Alerts 2019, Contact Form, Useful Contacts, and Bradon HOA Board. The main heading reads "Welcome to the Bradon Preserve Homeowners Association Website!". The introductory text states: "Peaceful, Tranquil, Serene. Located along the Fox River Conservatory in desirable Brookfield, Wisconsin, The Bradon Preserve Subdivision is the perfect location to call home." A second paragraph notes: "Located west of Brookfield Road on Lisbon Road, Bradon Preserve offers easy access to schools, shopping, recreational facilities and the Sharon Lynne Wilson Center for the Arts."

# Maintenance Enforcement – No SWMMA vs. SWMMA

## NR 151.121 Post-construction performance standards.

**NR 151.121(3)** Responsible party.

The landowner of the post-construction site or other person contracted or obligated by other agreement with the landowner to implement and maintain post-construction storm water BMPs is the responsible party and shall comply with ss. NR 151.121 to 151.128.

- Owner agrees to indemnify and hold harmless the City, its officers, agents and employees against any and all actions, damages, judgments, costs, or fees of any kind whatsoever arising out of any act, error, or omission of the Owner, its agents, or employees relating to this agreement.
- Copies of all inspection reports must be submitted to the City of Brookfield every other year, beginning on the first even year after the signing of the Agreement (e.g. Agreement signed in 2023, first report is due in 2024, then 2026, and so on). Inspection reports must be sent by January 31 to: ATTN: Stormwater Engineer, City of Brookfield – Engineering, 2000 N. Calhoun Road, Brookfield, WI 53005.

Dated this 18<sup>th</sup> day of August, 2022.

## STORMWATER MANAGEMENT FACILITIES OPERATION & INSPECTION REPORT

**Business/Site Name:** \_\_\_\_\_

**Address:** \_\_\_\_\_, Brookfield, WI

Complete the attached checklist(s); if you have more than one of any of the Best Management Practices (BMP) facilities listed (e.g. 4 catch basins, 2 detention ponds, etc.), please copy the checklist and complete one for each of the facilities separately. If you require more space for notes or comments, feel free to attach additional sheets. If you have questions, please contact Theresa Caven at the City of Brookfield.

**Please Note:** It is recommended that you have an engineering or BMP specialist assist you in the inspection of your stormwater BMP facilities.

# Maintenance Enforcement

## Detention (Dry) Pond Checklist

Frequency	Date(s) Checked	Problem	Conditions to Check For	Conditions That Should Exist	Score (0-3, N/A)
SPRING FALL		Trash & Debris	Any trash and debris which exceed 1 ft <sup>3</sup> per 1,000 ft <sup>2</sup> . In general, there should be no visual evidence of dumping. If less than threshold, all trash and debris will be removed as part of next scheduled maintenance.	All trash and debris cleared from site.	
ANNUAL		Poisonous Vegetation and noxious weeds	Any poisonous or nuisance vegetation which may constitute a hazard to maintenance personnel or the public. Any evidence of noxious weeds as defined by State or local regulations. (Apply requirements of adopted IPM policies for the use of herbicides).	No danger of poisonous vegetation around BMP or where the public might normally be. Complete eradication of noxious weeds may not be possible. Compliance with State eradication policies required.	
SPRING FALL		Contaminants and Pollution	Any evidence of oil, gasoline, contaminants, or other pollutants. Removal/cleanup may need to be coordinated with local water	No contaminants or pollutants present.	

### Bioretention / Biofiltration Basin

Bioretention basins (bioretention cells, rain gardens, biofiltration ponds) use soil, plants and microbes to treat stormwater before it is infiltrated or discharged. Bioretention areas are shallow depressions filled with sandy soil, topped with a thick layer of mulch, and planted with dense vegetation.

Stormwater runoff flows into the bioretention basin, percolates through the soil (which acts as a filter) and eventually drains into the groundwater; some of the water is also absorbed by the plants. Bioretention areas are usually designed to allow ponded water and with an overflow outlet to prevent flooding during larger storm events. Where soils have low permeability or where faster drainage is desired, designers may incorporate a perforated underdrain that routes to a storm drain system.

Bioretention areas can provide excellent pollutant removal and recharge for the "first flush" of stormwater runoff. Properly designed bioretention areas will remove suspended solids, metals, and nutrients. Distributed around a property, bioretention areas can enhance site aesthetics. In residential developments they are often marketed as property amenities. Routine maintenance is simple and can be handled by homeowners or conventional landscaping companies, with proper direction.
